Experience

Freelance / UX/UI Designer / Jul 2022 - Present

- Lead UX strategy and end-to-end web design, delivering streamlined Webflow experiences that improve engagement and conversions
- Design and refine B2C/B2B platform architecture, user flows, and UI, optimizing usability and business impact

Marketwake / Senior UX/UI Designer / Aug 2021 - Sep 2024

A web design and marketing agency where I led UX/UI and product design for 30+ clients, including University of Georgia, Lear, and Machete

- Led clients through user research, wireframing, and high-fidelity phases, driving collaboration and aligning design solutions with user needs, ensuring final products met user and business needs, leading to high client satisfaction and adoption
- Redesigned UGA's Grady College website, improving accessibility and navigation for 1,400+ students and faculty. Post-redesign surveys showed a ~30% increase in perceived usability and satisfaction
- Partnered with engineering and product teams to design and launch core features for Punchlist, aligning UX with business goals and technical constraints, resulting in a 33% revenue increase within two months
- Led the transition from Adobe XD to Figma, standardizing design workflows and improving collaboration across design and development teams
- Designed, built, and maintained scalable design systems for multiple SaaS platforms (Flowpath & Punchlist), creating reusable UI components that streamlined development and improved consistency across applications
- Mentored junior designers and led workshops on research methodologies, usability testing, and Figma best practices
- Implemented and worked with data-driven feedback tools like Hotjar and Google Analytics, driving ongoing UX improvements and reducing bounce rates by up to 87%

Betta Innovations / UX Designer / Jul 2019 - Mar 2020

A UX research startup where I refined my skills in user research, design iteration, and integrating user and stakeholder feedback

- Created wireframes and low-fidelity prototypes to visualize early-stage concepts, facilitating client and stakeholder feedback and enabling a smoother design iteration process
- Collaborated with designers, developers, and project managers to align UX goals with technical requirements
